

LIFT Mobile

LIFT Mobile is a global messaging application that combines the simplicity and ease of traditional paging with the advanced technology of your smartphone.

Features

- SSL encryption protects highly secure messages
- Critical messages, emails and SMS text messages are separated within the app for efficient and easy use
- A separate number attached to the app keeps mobile numbers private
- As an app downloaded to an existing smartphone, there's no need to carry multiple devices
- Messages are composed and sent to anyone with a LIFT phone number right from the app
- Global coverage is available via cellular or Wi-Fi networks
- A complete message audit trail, including when messages were sent, read and responded to, ensures regulatory compliance
- Custom or canned messages make replying quick and easy
- Rapid message delivery gets critical messages out to users quickly
- Customizable, distinct notification guarantees critical messages are seen immediately

The LIFT Mobile application is available for Android devices operating on V4.0 or higher, Apple iOS 8 or higher and the Android-based Blackberry.[®]
